TONBRIDGE
SCHOOL

EDUCATION

"Following a competitive tender process, we appointed Powercor to install solar panels at our sports complex, the Tonbridge School Centre. Powercor delivered this project on budget and ahead of schedule, working very effectively with our own multi-disciplinary team on site.

I have been particularly impressed with the commitment Chris and his team have evidenced to provide outstanding customer service and manage the complexities of delivering a project on a busy site. The results are outstanding, saving the School money whilst supporting our wider sustainability plans for the future.

I am looking forward to a continued partnership with Powercor as we look ahead to further investments in solar power across our site".

St George's
WEYBRIDGE

“St George’s Weybridge and Powercor have developed a relationship over the past 25 years which continues to go from strength to strength, based on mutual trust, transparency, and a professional understanding, built on a commitment to deliver the best value for money with exceptionally high standards.

All employees of Powercor are professional, courteous, and understanding of the standards expected whilst working within an educational setting. Projects are planned with realistic timeframes, considering supply chain timelines and the college term-time calendar.

Their expertise and advice will ensure that the college continues to meet future needs whilst continuingly meeting industry best practice standards.

Powercor are committed to delivering outstanding support to the college and their professional approach, coupled with their innovative plans to enhance the college will ensure that the mutual understanding and trust continue to underpin everything we do together in the future.”

TECHNOLOGY

"Vision Engineering had a solar photovoltaic system installed by Powercor, and I couldn't be more pleased with the results. From start to finish, their team demonstrated a level of expertise and professionalism that truly sets them apart. They were incredibly helpful, addressing all my questions and concerns promptly and thoroughly.

The installation itself was executed flawlessly. The team took care to ensure everything was done to the highest

standards, leaving me with a system that performs beautifully and looks great too.

Thanks to Powercor, we're now enjoying the benefits of clean, renewable energy and it's a positive step to help us reduce our carbon footprint. I highly recommend their services to anyone considering a solar installation. Fantastic work!"

“Farleigh School partnered with Powercor to enhance our energy efficiency on the back of their strong reputation in the renewable and photo-voltaic sector and the experience has been excellent.

We knew that it was going to be a challenging project as we already had a small array of solar panels on one of our buildings, so to install an additional 5 major systems to our site with all of them inter-linked and talking to each other was pushing innovation to its limit.

Everybody involved made the whole process easy, from all the technical information and applications to the electrical installation and external roof arrays, Powercor were there to help, and we look forward to doing further business with them.”

Bradfield College is delighted to share our positive experience with Powercor, who have installed six commercial solar arrays at the College over the last eighteen months. Throughout the projects, they have demonstrated exceptional professionalism and reliability, and their team have consistently adhered to the highest safety standards, ensuring a safe and secure working environment for staff and pupils at the College.

Powercor have exhibited a conscientious approach to their work, paying meticulous attention to detail and maintaining open communication with us at every stage. Their dedication to designing and delivering quality results has significantly contributed to the success of our solar energy initiative.

We highly recommend Powercor for any commercial solar installation projects. Their expertise and commitment to excellence are truly commendable.

Working with Powercor has been a positive experience. They expertly installed solar panels at our school during a critical time of public exams, ensuring a seamless process with no complaints about noise.

The success of the first phase led us to engage Powercor once more for the second phase, this time gracing our sports hall roof with over 100 panels. This installation was completed in just one week.

I wholeheartedly recommend Powercor to any organisation eager to embrace the future of solar energy.

RYDE SCHOOL
WITH UPPER CHINE

EDUCATION

"We're delighted with the recent solar panel installation at Ryde School with Upper Chine, carried out by Powercor. The project was a great success, completed efficiently and to the highest standard. Thanks to Powercor's professional and well-organised approach, the entire process ran smoothly from start to finish. We're proud to take this step towards sustainability with such a reliable partner."
