

SOLAR PV MAINTENANCE ENGINEER

Powercor is a multi-award-winning company within the renewable energy sector that has an established track record of providing job opportunities and long-term careers to people in the electrical and sustainability industry.

Based in Weybridge, Surrey and operating predominately in London and the Southeast, the company has a healthy order book and is looking to recruit talented individuals to join its team.

We are currently looking to recruit experienced Solar Maintenance and Install engineers to join our well-established, innovative Company during a period of growth and expansion.

We are involved in all aspects of electrical engineering but are highly passionate about new sustainable energy and lighting innovations that are shaping the future of this market.

The successful candidate will be part of a fantastic team that carry out the maintenance and installation of solar PV systems in high-end residential properties, schools, colleges, commercial and industrial buildings.

Main Responsibilities

- Installation and Maintenance of Solar PV systems on residential, commercial and industrial properties.
- Lead and execute projects with a high standard of workmanship and efficiency to uphold our reputation as an industry leader with 5-star customer reviews.
- Carry out Solar PV system upgrades and improvements to the highest quality standards.
- Be professional: Arrive on time, communicate effectively with teammates and customers, and demonstrate accountability, responsibility, and ownership.
- Reactive Repairs – Troubleshooting and resolving issues with solar PV systems and battery storage solutions.
- Always adhere to all HSE procedures and play an active role in conducting site surveys and risk assessments.
- Preventative and corrective maintenance of electrical components, inverters & modules.
- Maintain high-quality, accurate, compliant, and diligent workmanship ensuring compliance with industry regulations and standards.
- Demonstrate expertise in fault finding and ensuring the correct functioning of complex systems.
- To ensure that the relevant documentation is fully completed in an accurate and timely manner – including instructions, timesheets, work reports, service reports.
